PROFILE

Motivated B.Sc. Computer Science graduate preparing for an entry-level Cloud / DevOps role. Building hands-on foundations in AWS, Linux, networking, Git, Docker, CI/CD and Infrastructure as Code. Eager to learn, contribute and grow in a professional engineering team.

TECHNICAL SKILLS

AWS Linux / Ubuntu Git & GitHub Docker CI/CD Terraform Networking Bash HTML CSS JavaScript

PROJECTS

Cloud Web Application

AWS • EC2 • S3 • VPC

Designed a beginner-friendly cloud deployment architecture covering compute, storage, networking and secure access.

Dockerized Web App

Docker • Linux • Git

Containerized a web application to understand reproducible environments and portable deployment workflows.

CI/CD Pipeline Lab

GitHub • CI/CD • Bash

Created a learning pipeline demonstrating automated build, test and deployment stages.

Terraform AWS Lab

Terraform • AWS • IaC

Explored Infrastructure as Code for repeatable cloud resource provisioning.

EDUCATION

B.Sc. Computer Science

2022 — 2025 | ABC College of Science & Technology, Maharashtra

Programming, DBMS, Web Development, Networking.

HSC — Science

2020 — 2022 | XYZ Junior College, Maharashtra

Science stream with Computer Science.

LEARNING FOCUS

AWS architecture • Linux administration • Docker • CI/CD • Terraform • Monitoring • Cloud security • Networking

CAREER OBJECTIVE

To start my career in Cloud / DevOps, contribute to real-world infrastructure and deployment work, and continuously develop strong automation and cloud engineering skills.
